Cageball

The ultimate Event

Cageball is a premium event out of our selection of free-standing units. Cageball can be added to your existing park or integrated in a new park

Cageball can be configured in single or double units. A score counting system can be added optional.

Our Cageball units are fully compliant to the BSI PAS 5000 standard and will be provided with and type certificate.

Jump Parks Europe

At Jump Parks Europe we continuously challenge ourselves to create surprising new elements that enrich your new trampoline park, or which can be added as novelty to your existing trampoline park. With new events we increase the attractiveness of your park.

Cageball

A game of endurance, strength and agility, Cageball, will tire out the best athletes but will bring also joy and fun to the ones that enjoy free style competition. The essence of the game is reading the other players movements and adjusting your shot and jump accordingly. Competing makes that your brain is preoccupied with other stimuli, helping to take your mind off how tired you might feel. In short, Cageball will physically exhaust you while leaving you wanting more of this intense hybrid fun sport.

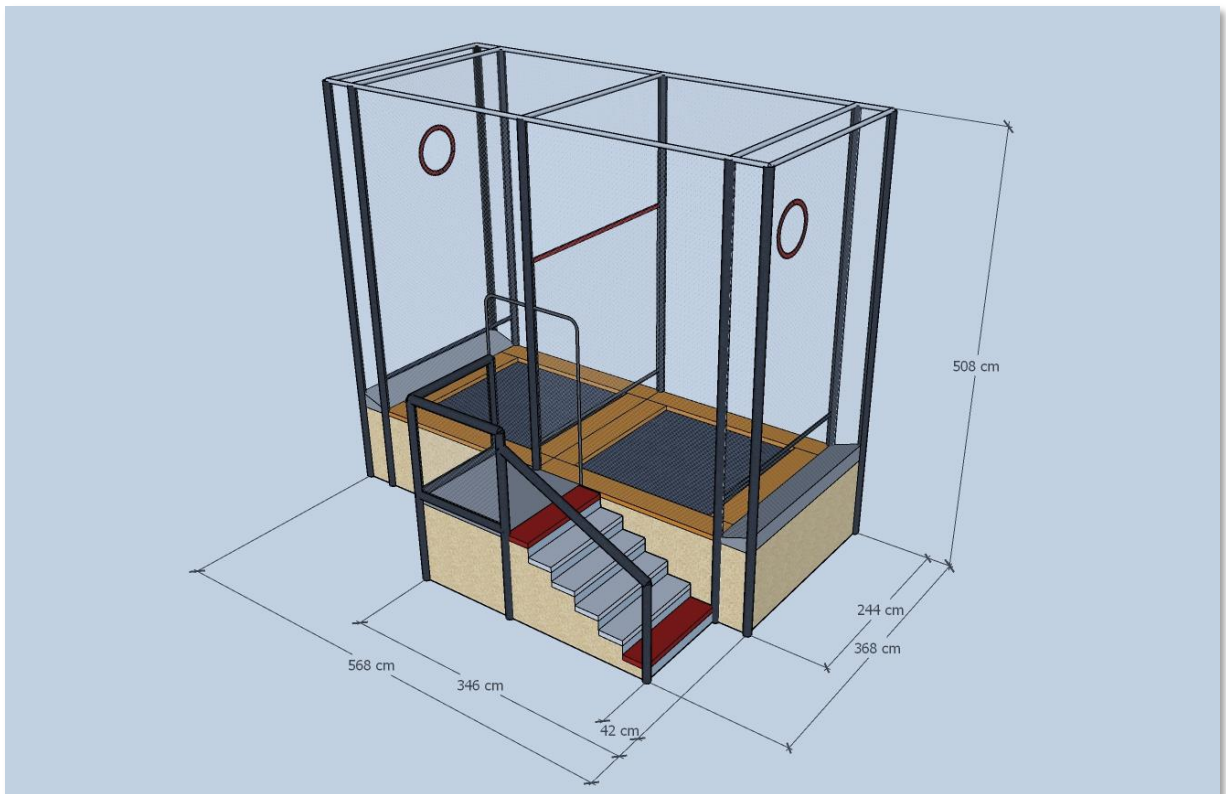

Special features:

The Jump Parks Europe trampolines are provided with a unique progressive spring system. With this system the force on the jumper's joints upon impact will be gradually built up avoiding peak loads on the jumper's physics.

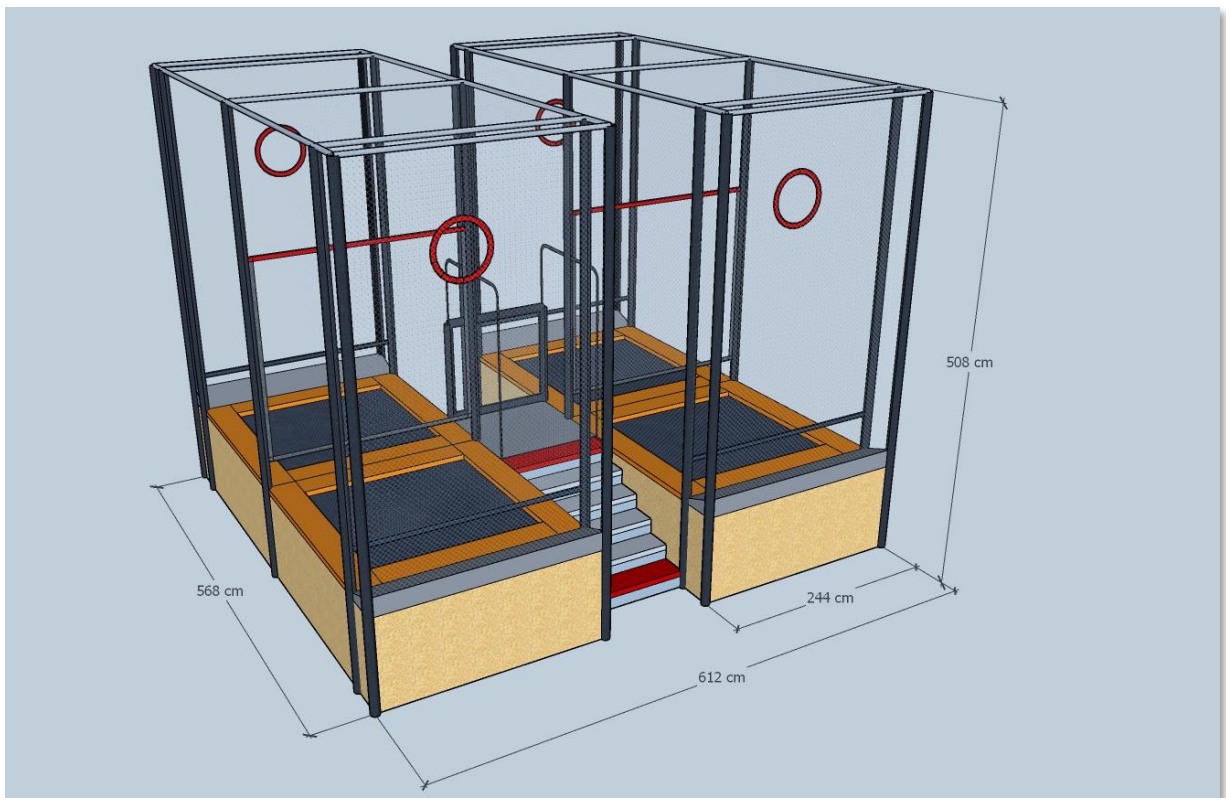

Dimensions Single Cageball

Cageball allows you to add an exiting new event to your trampoline park requiring a limited footprint. The unit needs to be placed with a minimum clearance of 50 cm to adjoining walls or other obstacles.

Dimensions Double Cageball

Double Cageball allows you to add an additional unit with just a limited additional footprint. The unit needs to be placed with a minimum clearance of 50 cm to adjoining walls or other obstacles.

Use:

Cageball is intended to be used for leisure whereas the visitors of the park will be guided and instructed by the operator/supervisor on the use and risks of use. Visitors will at all times be instructed prior to the use of each individual event.
